DENSO ULTRASEAL TAPE

DESCRIPTION: Denso Ultraseal Tape is a component of the Steelcoat 400 System for the protection of above ground steelwork from corrosion.

COMPOSITION: An acrylic coated non woven synthetic fibre fabric coated on one side with a polymer bitumen adhesive compound. It has a release paper interleaving which is removed during application. It contains no volatile components

PROPERTIES:

Breaking Strength: 3N/mm

Elongation @ break: 45%

Adhesion Peel Strength:
To Steel 2.8N/mm
To Self 2.2N/mm

Temperature Range:
For application +5 °C to +50 °C
For Service 65 °C maximum

Dimensions:
Roll Length 15 metres minimum
Thickness (ASTM D1000) 1.25 mm average
Weight 1.40 kg/m²

Recommended Primer: Denso Penetrating Primer **OR**
Denso Primer D

Recommended Outercoating: Denso Acrylic Topcoat **OR**
Denso Epoxy Topcoat
