

For optimum results clean substrate to Sa2½.

Denso Epoxy CTR is a safe, non-carcinogenic, alternative to traditional epoxy coal tar coatings. This high quality protective

coating has been designed for brush or spray application to steel or concrete wherever traditional coal tar epoxies have been specified.

Main Uses:

The long term protection of steel or concrete against water or sea water corrosion for...

Sheet pilings • Tubular piles • Lock gates • Pipe externals • Reservoirs • Pontoons

Advantages:

- Non-carcinogenic
- VOC compliant (89% solids)
- Touch dry in 2 hours
- Tolerant of moist surfaces
- Tolerant of existing coatings
- Continues to cure when immersed
- Cures at 0°C
- Brush or spray applied
- Easy brushing
- Available in colours
